April 14, 2014

TO: External Stakeholders Utilizing DHSMV Mainframe Services

FROM: Maureen Johnson, Chief   
Bureau of Records  
Division of Motorist Services

SUBJECT: **2<sup>nd</sup> Reminder - Discontinuance of DRC1 System**

The Department recently contacted users of the DRC1 system back in late February and informed them that DRC1 will no longer be available effective **May 15, 2014**. DRC1 will be permanently turned off on this date. Please know this date remains the cut-off date in which DRC1 will no longer be available.

Because DRC1 will be shut off permanently next month, we are continuing to encourage all external stakeholders to set up accounts for DAVID and begin using this system so you are comfortable with its functionality prior to the system being turned off. If you currently have the DAVE system, you will be rolled over to the new DAVID system. However, if you do not have the DAVE system and will require access you must execute a Memorandum of Understanding with the department. You will then be set up with the new DAVID system, which is web-based and does not require technical work on your end.

If you currently receive transcripts through DRC1, you may contact our Data Listing Unit for access to our Transcript Exchange Service, which will also require a Memorandum of Understanding.

Also, please know that when DRC1 is permanently turned off on May 15, 2014, users will lose their DRC1 print capabilities and printer maintenance.

If you need more information regarding access to the DAVID system or have other questions, please contact our Data Listings Unit at [DataListingUnit@flhsmv.gov](mailto:DataListingUnit@flhsmv.gov).
