Important Information for all Manufacturers, Distributors and Importers of Gas Powered and Electric Motorcycles

In order to ensure no delay at the Tax Collectors' Offices when processing titles and registrations for gas powered and electric motorcycles, the Department would like to share some important information with you.

The Department licenses manufacturers, importers and distributors of both electric and gas powered vehicles. For title and registration purposes the following information is essential on the Manufacturer's Certificate of Origin (MCO) or Manufacturer's Statement of Origin (MSO):

- If the vehicle is an electric motorcycle the MSO or MCO must state the displacement of engine in Watts.
- If the vehicle is a gas powered motorcycle the displacement of the engine must be stated in cubic centimeters.

Conversion Table for Watts to bhp to cc.

The following conversion factor can be used to help you when titling electric motorcycles

Engine Output in Watts	Engine Output in bhp	Engine Displacement in cc	Type of Vehicle	Manufacturers, Importers and Distributors must be licensed by the Department	Dealer or person must be licensed by the Department as a franchise dealer
1492 Watts or less	2.0 hp or less	50cc or less	Motorcycle	YES	NO
Greater than 1492 Watts	Greater than 2.0 hp	Greater than 50cc	Motorcycle	YES	YES

PLEASE NOTE:

An MCO with an engine output greater than 1492 Watts or greater than 2.0 bhp will be considered a motorcycle with an engine displacement greater than 50cc.

An MCO with an engine output 1492 Watts or less or 2.0 bhp or less will be considered a motorcycle with an engine displacement of 50cc or less.

Pursuant to section 322.01(26), Florida Statutes, a "Motorcycle" means a motor vehicle powered by a motor with a displacement of more than 50 cubic centimeters, having a seat or saddle for the use of the rider, and designed to travel on not more than three wheels in contact with the ground, but excluding a tractor or moped. This law covers drivers of motorcycles. This helps the Division of Motorist Services determine whether motorcycle endorsements are required. If the bike falls outside the definition, the purchaser is not required to obtain an endorsement on their driver's license.

Pursuant to section 320.01(27), Florida Statutes, "Motorcycle" means any motor vehicle having a seat or saddle for the use of the rider and designed to travel on not more than three wheels in contact with the ground, but excluding a tractor, a moped, or a vehicle in which the operator is enclosed by a cabin. This law helps tax collector offices across the

state determine how a vehicle should be titled and registered. As you can see, the displacement in cubic centimeters is not mentioned here, however, we capture this information in our database and law enforcement uses it to determine if the person driving the bike needs an endorsement.

Manufacturers, importers or distributors of motorcycles regardless of the engine displacement must be licensed by the Department. Section 320.27, Florida Statutes, requires persons who sell motorcycles with a displacement greater than 50 cubic centimeters (cc) (equivalent to greater than 2 bhp or greater than 1492 Watts) to be licensed by this Department. Motorcycles with an engine displacement 50 cubic centimeters (cc) or less, (equivalent to 2 bhp or less or 1492 watts or less) can be sold by anyone provided the manufacturer, importer or distributor is licensed by the Department.

As a part of the licensing procedure the Department provides assistance to the licensee regarding the accuracy of information listed on their MCO so that the tax collector community can title and register the vehicle properly.

In order to facilitate the process of title and registration at the Tax Collectors' Offices; the Department requires manufacturers, importers and distributors to state the displacement in cubic centimeters for gas powered motorcycles or watts for electric motorcycles on the Manufacturer's Statement of Origin.

The following information is required on an MCO.

- Name of the manufacturer registered with National Highway Traffic Safety Administration (NHTSA) on the top of the MCO;
- Correct Vehicle Identification Number (VIN) as assigned by NHTSA;
- Correct National Crime Information Center (NCIC) assigned line-make under the "make";
- Correct body type;
- Correct displacement expressed in cc if the vehicle is a gas powered motorcycle; or correct displacement in watts if the vehicle is an electric motorcycle;
- Name of the licensed manufacturer, distributor or importer at the bottom of the MCO;
- Name and address of the licensed franchise dealer in the middle if the vehicle is a motorcycle greater than 50cc or greater than 2 bhp or greater than 1492 watts;
- Name of the purchaser in the middle if the vehicle is a motorcycles is 50cc or less or 2 bhp or less or 1492 watts or less.

Please note that the displacement in cc can be stated anywhere on the MCO.

Sincerely
Bureau of Motor Vehicle Field Operations

Once the Department receives your completed application and required documents listed above, the Department will request the National Crime Information Center (NCIC) to assign you a "line-make" which will be reflected on your Manufacturer's Statement of Origin (MSO) or your Manufacturer's Certificate of Origin (MCO). Once the line-make has been assigned by NCIC, the Department will fax or email you a sample of the MSO. Please provide the Department an original sample of your MSO or MCO based on the faxed or emailed sample. You may stamp "VOID" or "SPECIMEN" across the front of the MSO. The MSO or MCO must be printed in accordance with the attached specification set forth by the State of Florida. **Please Note: Do not send the MSO or MCO with your application until your line-make has been assigned and the Department has faxed or emailed you a sample.**

Please Note: Conversion companies that add living quarters to trailers must submit the 1st stage MCO and the 2nd stage MCO to their dealers.
